NOTABLE PROJECTS

- **Vacation Calendar** | **React, Tailwind.css, JavaScript, HTML, MySQL, Vite**
  - **React-based** application allowing employees to authenticate and manage vacation requests, with both frontend and full-stack versions available.
- **E-Commerce Website** | **React, Vite, Tailwind.css, JavaScript, HTML**
  - A **React + Vite** app that is a mockup of an e-commerce website.
- **Simple Register App** | **C++, Flutter, Dart, Gradle**
  - A cash register app that has products with their prices that the user can add and shows the total, build in Android Studio. It was a first for me with these technologies.
